

NAMAN

Full Stack Software Developer · .NET Core · React · SQL Server

namanmattu4450@gmail.com · +61 411 331 848 · naman-dev.com · linkedin.com/in/naman9896 · github.com/naman9896

Full Stack Developer with a **Master of IT (University of Newcastle)** and hands-on experience building and deploying production-grade web and cross-platform applications using **C#, ASP.NET Core, React, and SQL Server**. Delivered SaaS platforms with JWT authentication, paginated REST APIs, and containerised CI/CD deployments. Comfortable working in Agile teams, contributing to code reviews, and shipping quality solutions under real-world constraints.

TECHNICAL SKILLS

Languages: C# · JavaScript · TypeScript · Python

Frontend: React.js · Redux · TypeScript · HTML5 · CSS3 · Next.js

Backend: ASP.NET Core · .NET MAUI · Node.js · REST APIs · OAuth 2.0 · JWT · Hangfire

Databases: MS SQL Server · T-SQL · PostgreSQL · MongoDB · EF Core

DevOps / Cloud: Docker · Azure DevOps · Azure Data Fundamentals · AWS Fundamentals · Git · CI/CD

Tools: Visual Studio · VS Code · JIRA · Figma · Power BI

PROJECTS

Job Application Tracker | [Full Stack SaaS Web App](#)

2024–2025

ASP.NET Core · React · PostgreSQL · Docker · JWT · Vercel · Render

- ▶ Built and deployed a production-grade full stack SaaS app end-to-end: ASP.NET Core Web API backend containerised with Docker on Render, React frontend on Vercel, and PostgreSQL on Neon — fully live on cloud infrastructure with zero downtime.
- ▶ Implemented JWT-based multi-user authentication with secure per-user data isolation, auto token expiry, and protected API endpoints — mirroring production SaaS auth patterns.
- ▶ Engineered a paginated REST API with filtering by status, search by company/role, and bi-directional sorting — designed for scalability as dataset size grows.
- ▶ Delivered an analytics dashboard with live stats and Chart.js visualisations, plus an upcoming-interviews panel sorted by nearest date.

Vehicle History & Fuel Tracker | [Cross-Platform Mobile App](#)

2024–2025

.NET MAUI · C# · NSW OpenData REST APIs · EF Core · SQLite

- ▶ Delivered a cross-platform iOS/Android app from scratch — covering design, REST API integration, and submission — in a single development cycle with zero critical bugs.
- ▶ Integrated NSW OpenData live fuel price APIs to eliminate manual cost estimation, providing real-time suburb-level pricing across multiple fuel types.
- ▶ Engineered full CRUD data persistence for vehicle records and trip history using EF Core, enabling fuel efficiency trend tracking across multiple trips.

Apprenant — Social Learning Platform | [Full Stack Web App](#)

2023

Node.js · MongoDB · Google OAuth 2.0 · REST APIs · EJS

- ▶ Led backend development in a 5-person Agile team, shipping Google OAuth 2.0 authentication, post sharing, and community creation features within a 6-week sprint.
- ▶ Architected MongoDB schema and Node.js REST endpoints serving all dynamic content, achieving sub-200ms average response times in load testing.

Car Share Bay Usage Analysis | [Data Analytics Project](#)

2024

Python · Pandas · Power BI

- ▶ Processed and cleaned a 10,000+ row City of Sydney dataset, reducing data quality issues by standardising time formats and removing 8% corrupt entries.
- ▶ Produced a 6-panel Power BI dashboard surfacing 3 actionable urban mobility insights; earned a Distinction from the University of Newcastle faculty panel.

EDUCATION

Master of Information Technology | [University of Newcastle, NSW](#)

May 2023 – Jun 2025

Relevant coursework: Data Analytics · Software Development · System Analysis & Design · IT Project Management

Bachelor of Computer Application (Distinction) | [Chitkara University, India](#)

Aug 2019 – Jul 2022

Core studies: OOP · Web Development · Data Structures & Algorithms · DBMS

CERTIFICATIONS

Azure Data Fundamentals · Microsoft **Full-Stack Web Development Bootcamp** · Udemy

Python Programming · University of Michigan **Bootstrap 4 Front-End Framework** · Coursera

OTHER EXPERIENCE

Assistant Manager | [Ampol Australia](#)

May 2024 – Present · Raymond Terrace

- ▶ Reduced stock discrepancies by standardising digital record-keeping across store systems, cutting end-of-shift reconciliation errors.
- ▶ Improved customer issue resolution speed through structured communication protocols, contributing to higher satisfaction scores during peak hours.
